New York Stock Market

provement in the European politica situation consequent upon Montene gro's decision to yield to the powers and the resultant strength of securities abroad, exerted the dominating influence upon the stock market to-day. Expectations of speedy settlement of problems which have menaced the peace of Europe for months opened up the prospect of the repurchasing up the prospect of the repurchasing of American securities by foreign investors. London, in fact, has been buying stocks on every favorable opportunity for some time, and before the opening here, American stocks in London were marked up sharply. The situation was one which offered no comfort to the bears, and there was spirited hidding for stocks to cover spirited hidding for stocks to cover when the market opened. London also was in this market, buying most heavily of Steel, Amalgamated Copper

Operations on the long side were carried on more confidently, and in the first hour there was a quick upturn, resulting in gains for important issues of 1 to 3 points.

The action of the market during the

remainder of the day showed that the improving prespects abroad had not produced sufficient effect here to bring about aggressive and sustained buying for the long account. Tradonying for the long account. That-ing grew dull and prices cased off, al-though in the final hour the list rose to around the top again. There were several developments at home which served to take off the edge of any tendency toward enthusiasm. Traders were disappointed at the Supreme Court's refusal to extend beyond July 1 the time for completing the Harti-man dissolution, and Union and South-

COTTON MARKETS.

New York, May 5 - Business was comparatively quet in the cotton infirket to-day, and fluctuations were more or less irregular with the close steady not unchanged to 5 points lower. The opening was being steady at a decline of 20s points and the market sood off to a not decline of some 870 points during the morning. Reports of good rains in the Southwest and favorable private crop advices combined with somewhat disappointing laterpose delies and imports that certain of the Fail River mills would close down for an indefinite period, beginning next Monday, seemed to account for the decline. On the break which carried prives tack to within 5 or i points of the low level of last week there was a considerable demand, however, which seemed to be partly in the way of realizing by recent selfers as well as buying here against sales in the English market, and prices steaded up from the lowest during the carry afternoon. Rumors that the old crop long breezes was preparing to receive further deliveres on contracts and the failure of bearing leens in the news to create a more aggressive selling power were probably factors on the raily, which was proparing to receive further deliveres on contracts and the failure of bearing leens in the news to create a more aggressive selling power were probably factors on the raily, which was propended and of crop position. Closing private were political advices were considered rather more reassuring, and it was removed that the shutting down of some of the Fail River and its was apposed to be the result of a few additional notices.
